**Subject:** RE: electricity rate increase

Hello,

I have lived in Forest Grove for 20 years. I am writing in opposition to the consideration to increase electricity rates by 4.75%. It seems we have had several increases over the past several years. I have always been appreciative of the consistency of service. I understand that forest grove wants to grow and with growth comes cost, but I think that this increase needs to be paid for my those increasing the need for rate increases.

I just say "NO! to rate increases.

Thanks.

Robin Davis

**Subject:** Rate increase

I am opposed to the rate increase, the last 2 years there has been substantial increases. It's to the point that people can't afford to even heat their house anymore. My moms neighbor froze to death because her heating bill was so high she couldn't afford it and started turning her heat off at night. She fell right after she turned it off and froze before her kids got there the next night.

There are many people commenting on Facebook how the huge increase is really hurting them.

**Subject:** Proposed Electrical Rate Increase

Dear Anna,

First, thank you for providing a convenient means of communicating with our Mayor and City Councilors.

Second, in concept, I am in favor of a reasonable rate increase that supports the reliability of our Forest Grove Light and Power system. My wife, Pan, and I have for many years been the beneficiaries of dependable and economical Forest Grove electrical service. Also, when we have encountered the crews in the field, they have always addressed us with courtesy and their project with competence and diligence.

Third, as to the costs and rates, I would encourage the funding to be adequate. I would rather see a rate decrease if reserves exceed our requirements than emergency increases because the service has been underfunded.

I appreciate the opportunity to submit comment and the time and effort devoted to this matter by City Staff and our elected officials.

Regards,

Mike Moore

**Subject:** Proposal for 4.75 percent electricity increase.

Hi,

I'm writing in reference to the proposal for the 4.75 percent increase in electricity/utilities. I do not support this proposed idea. I feel like utilities are already starting to sky rocket in cost. Forest Grove has always been reasonably priced in regards to utilities. We just had an increase in recent years and I do not feel like we're ready for another one.

Thank you for your time, have a wonderful day!

Heather Edwards
